

Aviston Elementary
School District 21
Aviston, Illinois

“Prost Heating and Cooling provides terrific service to my school district. Their representative, Curt, is knowledgeable and friendly. He explains repair and maintenance issues, gives estimates in a timely manner and is always available to assist quickly when we have HVAC issues.

In addition to preventive maintenance, our district installed PACE 2 Controllers to help us save energy. We were able to utilize several grants to pay for the devices and installation and we are seeing lower electric and gas bills. As school funding seems to be cut every year, it is important to find cost reductions wherever we can. The PACE controllers installed by Prost Heating and Cooling are part of our strategy to cut our energy costs while maintaining an excellent school district.”
